

*... to constantly provide
quantity surveying
services of exceptional
standard and quality*

COMPANY PROFILE

BYRON A CHRISTOU LLC
CHARTERED QUANTITY SURVEYORS

Our story

Byron A. Christou, as a self-employed entity was established in 2006 by Byron A. Christou, which was then registered as a private practice under the name of **Byron A. Christou L.L.C.** in March 2019.

Our Practice is now operating under its present style name of **BAC**, offering professional Quantity Surveying services mainly in the Cyprus Construction Industry.

We act as private consultants offering professional Quantity Surveying Services for a wide spectrum of client organizations and private individuals.

At present, our Practice is handling construction projects in Cyprus in excess of € 100.000.000 in value.

Our reputation is of great value to us and thus customer service is of paramount importance. Whilst constantly striving for improvement, our aim is to provide our customers with the level of service that, we ourselves, would like and expect to receive.

Based on this philosophy and strategy we have gained an honest and earnest reputation for prioritizing our customers.

BAC strives to differentiate in its field by being client focused. We place a lot of emphasis on the careful examination of the Client's needs in setting out the budget prior to the finalisation of the design, whilst acting as a catalyst in minimizing the risks of unforeseen costs. We believe that once the foundations of the economic aspects of a project are set properly at the early stages of the design, the risk of unforeseen costs during the construction of a project is minimised. Therefore, we believe that our role is fundamental at the early stages of a project's life.

Please feel free to review our website (<https://www.bacqs.com>) and if required do not hesitate to contact BAC for further details.

Our Mission

To constantly provide quantity surveying services of exceptional standard and quality through the highest level of professionalism, integrity and honesty.

Our Vision

To become a leader in our field by exceeding client expectations through exceptional service standard and quality.

Our team

Byron A. Christou *HND(Civil) Bsc (Hons) MBA MRICS*
Quantity Surveyor - Director

Byron Christou graduated as a Quantity Surveyor with a first-class honours degree from the University of Glamorgan in 2000, following his previous education at the Higher Technical Institute (HTI) between 1992 and 1995, where he graduated with the Higher National Diploma (with merit) in the field of Civil Engineering.

Maria is the personal assistant / accountant of our firm.

What do we do?

A quantity surveyor (QS) is a professional working within the construction industry concerned with construction costs.

Traditionally referred to as a Professional Quantity Surveyor or Private Practice Quantity Surveyor, Quantity Surveyors are broadly concerned with contracts and costs on construction projects.

The methods employed, however, cover a range of activities which may include cost planning, value management, feasibility studies, cost benefit analysis, lifecycle costing, tendering, valuation, change control, dispute resolution and cost estimation.

Services

QUANTITY SURVEYING SERVICES

We provide a full range of Quantity Surveying Services at pre-contract stage including Estimating & Tendering services, as well as post-contract services to clients and consultants.

Being Client focused, we primarily aim to identify and establish the Client's needs and project's primary objectives, and to provide the best possible services resulting in a project that is completed both on time and within budget, and thus exceeding the client's needs and expectations. These services may include:

- Initial Cost Advice / Feasibility Studies
- Budget Estimating & Cost Planning
- Preparation of Tender Documents
- Selection and appointment of Contractor
- Examination of tenders and tender reporting
- Project Monitoring during construction
- Preparation and settlement of Final Accounts

SPECIAL SERVICES

- Value Management
- Claims Management
